

Modern Problems Require Modern Solutions: Hybrid Concepts for Industrial Intrusion Detection

Simon D. Duque Antón, Mathias Strufe, Hans Dieter Schotten

24. VDE/ITG Fachtagung Mobilkommunikation 2019

@ Osnabrück

. IT networks

. IT networks

. Industrial Ethernet, e.g. OPC-UA, Profinet

. Fieldbus, e.g. Modbus, Profibus

. Direct connection, wired

Attacks on *Industry 4.0*

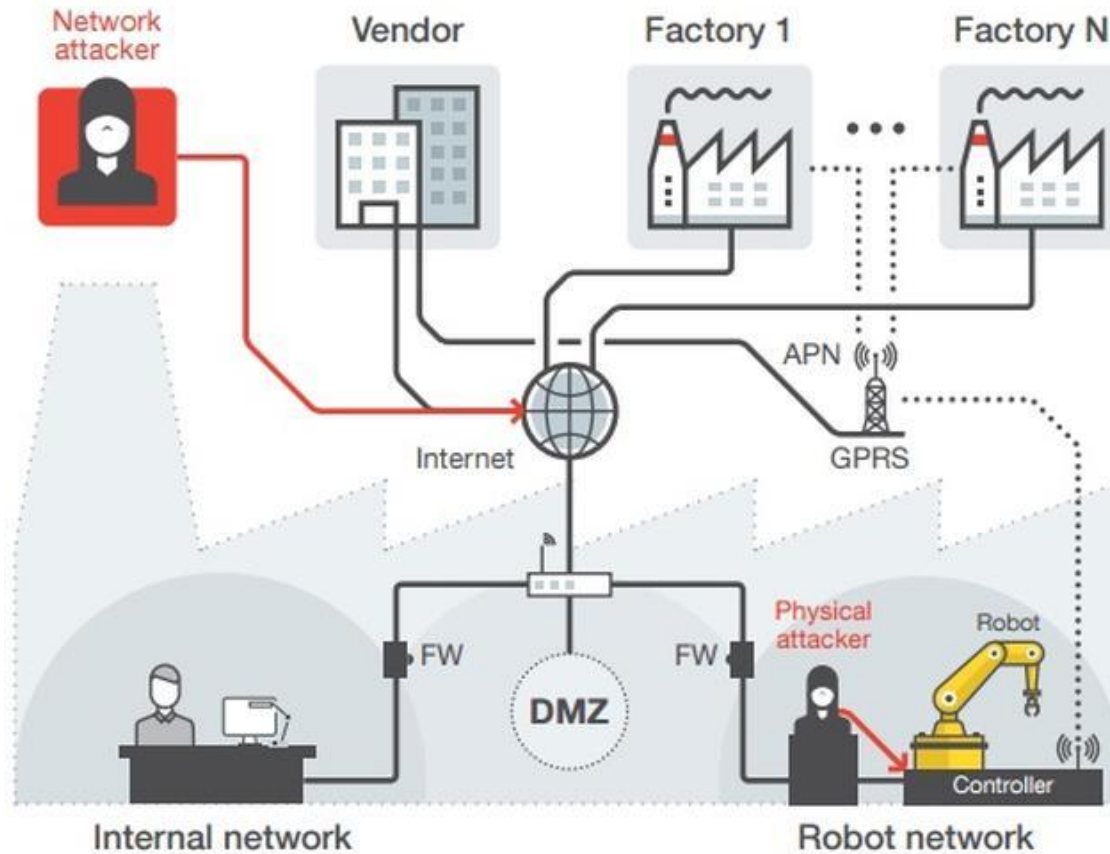

Image source: <https://www.techrepublic.com/article/industrial-robots-are-more-vulnerable-to-cyberattacks-than-you-think/>

- No feedback on process
- Compatible to legacy systems
- Understand proprietary protocols
- Work in highly application specific environments

Customized production
(Secure processes)

Marketplace for technology data
(Secure data)

Remote maintenance platform
(Secure services)

Visual IT security operation center
(Secure networks)

**Transfer of knowledge to
small and medium-sized
enterprises!**

- . Continuation of project IUNO**
- . Further refinement of previously implemented solutions**
- . Adaption of solutions to industry needs**
- . Close cooperation with industrial partners intended**

Topics Addressed

Detection

Fieldbus-based
Intrusion Detection

Industrial Malware
Analysis

Deception-based
Intrusion Detection

Industrial Anomaly
Detecion

Prevention

Dynamic Connectivity
and Integration of
Trust Anchors

Digital Rights
Management

Fieldbus Protection

Firmware Analysis

Secure Authentication
/ Identity and Access
Management (IAM)

Introduction

IUNO Insec

AD Example

Conclusion

Conclusion

- . *Industry 4.0* requires novel intrusion detection approaches
- . Solutions need to be adaptable to legacy systems
- . Industrial environments are highly application- and domain-specific
- . IUNO Insec aims at providing easy-to-use solutions for SMEs

Thank you!
