

# Data Protection and Security International Online Course

## Learning objectives:

In this course you will learn to recognise confidentiality and data protection issues and find solutions to them. You will also learn how to ensure information security in your work. In this course you get advice about what to do if the security of personal data has been compromised. Lessons also include the key concepts of data protection and the data subject's rights.

After the course kick off you can proceed with the course according to your own schedule. The course consists of learning assignments, videos and additional material. The course is evaluated numerically with 1 to 5 grades. In the virtual european summer school you will collaborate with students from Germany, Portugal and Finland.

## Who is this course for?

This course is recommended to Master`s or PhD students in health care and professionals from nursing, physiotherapy, midwifery, medicine and alike. We also invite students from health care management, health sciences, informatics and computer science to this interdisciplinary course. Participation is free of charge
