Information for international students regarding the 3G regulation

3G = Geimpft (vaccinated) – Genesen (recovered) – Getestet (tested)

Status: October 1, 2021

Dear international students,

In addition to the information for international students regarding the 3G regulation dated September 23, 2021, I would like to point out:

If you would like to see a doctor for advice or vaccinations but if you do not yet have the insurance card of a German health insurance company:

If newly arriving international students are only provisionally insured with a German public health insurance and have not yet activated their insurance and therefore have not yet received an insurance chip card, they can contact their health insurance company and ask for the issuance of a „Behandlungsschein“ (provisional insurance certificate). This is a paper document that can be presented to the doctor as proof of insurance instead of the insurance chip card. You will find contact details of health insurance companies here (page 3 of the ‘health insurance requirements’).

International students with incomplete vaccinations from abroad

If you have already been vaccinated once abroad and still need the second vaccination dose, please contact a doctor (general practitioner). The following general practitioner is informed that international students may need an appropriate consultation (also in English) and vaccination: Dr. Lankenfeld, Lotter Str. 82, 49078 Osnabrück, phone: +49 541 41422, hausratzpraxis@lankenfeld.de

If the first vaccination was carried out abroad with a vaccine approved in Germany and can be proven by presenting a corresponding certificate, the above-mentioned general practitioner will issue an EU COVID vaccination certificate.

If you receive a second vaccination in Germany, it will take at least two weeks until you are considered fully vaccinated and can prove your vaccination status via the EU COVID vaccination certificate. Until then, you will be considered unvaccinated.
