Entry into Germany – Federal State of Lower Saxony
Osnabrück (including branch campus in Lingen)

Information regarding Corona
Status: May 5, 2021
Please note that the regulations regarding entry, corona testing, reporting and quarantine obligations may change at short notice.

Please read the information on travel restrictions / border controls on the website of the German Federal Ministry of the Interior.

Entry restrictions and Entry bans
Depending on the country or region from which you are entering Germany, different entry requirements apply. The Robert Koch-Institut (RKI – the German public health institute) identifies the international risk areas and regularly updates their overview. A distinction is made between the following areas:
Areas with new virus variants (areas of variant of concern)
High incidence areas
Risk areas
Areas that are no longer considered risk areas

Entry ban from countries with new virus variants
For these areas, a transport ban applies to companies in rail, bus, ship or air transport. In principle, these companies are not allowed to transport persons from virus variant areas to Germany. Exceptions to the transport ban are possible in a few individual cases. Entry for study purposes does not fall under these exceptions. An entry ban also applies to persons who wish to enter Germany from virus-variant areas themselves (i.e. without a transport company). These regulations will initially apply until May 12, 2021.

Entry: Quarantine, Testing and Reporting Obligations
If you enter Germany from abroad, different obligations apply to you depending on the area from which you enter:

1. If you have stayed in a virus variant area within 10 days prior to entry:
   No entry is currently possible due to the travel /transport ban.

2. If you have been in a high incidence area within 10 days prior to entry:
   Reporting:
   You are obliged to make an entry notification via www.einreiseanmeldung.de before entering Germany. Bring a proof of your registration with you when travelling to Germany.

   Test:
   You are required to be tested before you even begin your journey to Germany. The test (PCR test or special antigen test) must be taken no earlier than 48 hours before entry. You must present a negative test result to the carrier (e.g. the airline) before departure. You may also be required to present the negative test result during immigration inspections.

   Quarantine:
   Regardless of the result of the first test, you are required to go directly to your accommodation immediately after entry and stay there without interruption for a period of 14 days after arrival.
During this period, you are not allowed to receive visits from persons who do not belong to your own household.

Exception: If you have been fully vaccinated with a vaccine approved in the EU at least 15 days prior to entry (first and second vaccination or vaccine-related single vaccination) and if you have vaccination documentation, you do not have to be quarantined.

3. If you have been in a risk area within 10 days prior to entry:
   Reporting:
   You are obliged to make an entry notification via www.einreiseanmeldung.de before entering Germany. Bring a proof of your registration with you when travelling to Germany.
   Test:
   You are required to be tested (PCR test or special antigen test, no rapid test) either within 48 hours before arrival or immediately after entry. There is a charge for the test.
   in Osnabrück: The test center in Osnabrück is located in Winkelhausenstraße. A test is only possible after prior registration: by mail to corona-osnabrueck@johanniter.de. In the mail you indicate: Name and first name, date of birth, address in Osnabrück, mobile phone number, the day on which you would like to be tested, the country from which you entered. You will receive an e-mail with the test date and further information. The test result is usually available within one to two days and can be retrieved via the QR code provided.
   in Lingen: Please email reiserueckkehrer@emsland.de for information on test centers and registration procedures.
   Quarantine:
   Regardless of the result of the first test, you are required to go directly to your accommodation immediately after entry and stay there without interruption for a period of 14 days after arrival. During this period, you are not allowed to receive visits from persons who do not belong to your own household.
   You can shorten the quarantine by having a second test done. This test can be done no earlier than on the fifth day after your entry. You may leave quarantine to have this test (and only for this purpose), only for the direct route to and from the test. You must remain in quarantine until the test result of the second test is available and negative.
   Exception: If you have been fully vaccinated with a vaccine approved in the EU at least 15 days prior to entry (first and second vaccination or vaccine-related single vaccination) and if you have vaccination documentation, you do not have to be quarantined.

4. If you come from an area that is not (anymore) classified as a risk/high incidence/viral variant area:
   No entry restrictions, testing or quarantine requirements apply. You can get tested voluntarily as a self-payer.

Appearance of Symptoms
   The following symptoms indicate an infection with the coronavirus: cough, fever, sometimes sore throat, runny nose, loss of sense of smell/taste, headache and aching limbs. If you have these symptoms, please consult a doctor.
   in Osnabrück:
   The following general practitioners have a joint practice very close to the university (Caprivi Campus) and are aware that international students may seek their advice. Communication in English is possible. Please call and describe the symptoms before you go there.
   Practice Lankenfeld (Dr. Uwe Lankenfeld, Dr. Lena Schillak, Stephanie Friederich)
The following general practitioners have a joint practice close to the university (Lingen Campus) and are aware that international students may seek their advice. Communication in English is possible. Please call and describe the symptoms before you go there.

Ludger Konrad Albers, Facharzt für Allgemeinmedizin, Am Wall Süd 20, 49808 Lingen
Tel.: 0591 – 90 111 100, info@hausarzt-albers.de, https://www.hausarzt-albers.de/
